

## **Outcomes Workgroup**

Robert Flanigan, MD, FACS, Chair  
Daniel McKellar, MD, FACS, Vice Chair  
Lisa Landvogt, CTR, Staff leader

### **Purpose:**

To develop new standards or criteria that reflect information required for valid analysis of patient outcomes useful to affect patterns of care.

To review, revise, and update current standards to focus on the current standard of treatment and ancillary cancer care.

To identify existing standards relating to treatment results and other outcomes that should become eligibility criteria.

### **Areas to address:**

2.11 Outcomes analysis

4.6 Patient guidelines (Cancer Program Practice Profile Reports component)

5.1 Clinical trial information

5.2 Clinical trial accrual

6.1 Supportive services (also part of clinical management)

6.2 Prevention and early detection

6.3 Review of outreach services

8.1 Studies of quality

8.2 Quality improvements

Consider adding measurement of the number of patients screened for community services and/or research activities
