

Who Will Hold My Hand?

# Who Will Hold My Hand?

A GUIDE FOR PARENTS WHOSE CHILD NEEDS AN OPERATION

## About the author

Before **Kathryn D. Anderson, MD, FACS**, became the first woman President of the American College of Surgeons in 2005–2006, she spent 32 years as a pediatric surgeon in Washington, DC, and Los Angeles, CA. During the course of her career, Dr. Anderson treated many young patients and helped their parents understand not only the conditions her patients had that required an operation but also how to navigate the complex system that is a medical center. Dr. Anderson's goal in writing this book was to help take away some of the helplessness and fear that parents feel when they hear the word surgery related to their child. Dr. Anderson shares her experience as a surgeon who has dealt with many children and their families over the years in order to help parents deal with the pain of learning how to deal with a situation they do not welcome in the first place.
