The Honorable Barbara Lee
Chair
Subcommittee on State, Foreign Operations, and Related Programs
U.S. House Committee on Appropriations
Washington, DC 20510

The Honorable Hal Rogers
Ranking Member
Subcommittee on State, Foreign Operations, and Related Programs
U.S. House Committee on Appropriations
Washington, DC 20510

Dear Chairman Coons, Ranking Member Graham, Chairwoman Lee, and Ranking Member Rogers:

On behalf of the undersigned organizations, we urge you to support inclusion of $100 million for Neglected Surgical Conditions within the State, Foreign Operations, and Related Programs (SFOPS) Appropriations Report for FY 2022. Such investment in global surgical care would transform the lives of millions of children and adults around the world.

Each year, global deaths from conditions requiring surgical care far exceed those from HIV/AIDS, tuberculosis, and malaria – combined.1 However, the burden of conditions requiring surgical intervention continues to be neglected as a public health strategy. By directing $100 million through USAID, the U.S. can lead the effort to transform health systems in low- and middle-income countries (LMICs), which has the potential to save 17 million lives per year and avert $12.3 trillion in lost GDP in LMICs over the next 15 years. The investment in surgical systems also supports pandemic preparedness plans as the increased capacity can be repurposed for treatment capacity during pandemics.2

The World Bank identified essential surgical care as one of the most cost-effective health interventions available and a health priority that is within reach for countries around the world.3 Additionally, World Health Assembly adopted a resolution in 2015, co-sponsored by the U.S., that acknowledged surgery and anesthesia as key components to strengthening health systems.4 As a result, all 16 member countries of the Southern African Development Community and all 26 countries of the Pacific Community are moving ahead to strengthen surgical systems and are developing national strategic plans. In 2020, all 37 countries of the WHO Western Pacific Region unanimously adopted a framework for action for safe and affordable surgery in the

region. These LMICs are determined to fill the currently unmet surgical gap of 143 million additional operations by the end of the decade, and the US has an opportunity to lead this global surgery movement.

Language recognizing the importance of strengthening capacity to address neglected surgical conditions was included in the FY 2021 SFOPS Report. We appreciate your past leadership and support, and urge you to consider the following report language for FY2022:

**Neglected Surgical Conditions** – The USAID Administrator shall provide no less than $100,000,000 to strengthen surgical health capacity to address such health issues as cleft lip and cleft palate, club foot, cataracts, hernias, fistulas, and untreated traumatic injuries in underserved areas in developing countries, including in contexts without water or electricity. Strengthening surgical health systems includes the training of local surgical teams to provide safe, sustainable, and timely surgical care, and assisting ministries of health to develop and implement national surgical, obstetric, trauma, and anesthesia plans.

Including the proposed language in the FY2022 SFOPS Report signifies a strong commitment and investment in global surgical care. Thank you in advance for your consideration. Should you have any questions, please do not hesitate to contact Amelia Suermann with the American College of Surgeons at asuermann@facs.org.

Sincerely,
