

Webcast Available – at No Cost – on Telemedicine, Telehealth, and Telemonitoring in Surgical Practice – from the 2019 ACS Clinical Congress

As health care professionals are seeking information about how to maintain social distancing during the COVID-19 Pandemic, the ACS Division of Education has made available at no cost the Webcast from the 2019 ACS Clinical Congress on Telemedicine, Telehealth, and Telemonitoring.

This session discussed the development of a telemedicine program, reviewed successful ophthalmology programs – especially in the VA System, and related its value to rural surgery practices as well as to busy inner-city hospital systems. Please click on the links below to view each presentation from this timely Panel Session.

[Introduction - Paul A. Edwards, MD, FACS](#)

[The Digital Disruption of Academic Medicine: Ending Bias, Borders, and Boredom - Todd A. Ponsky, MD, FACS](#)

[Statewide Pediatric Ophthalmology Telemedicine Project in Omaha - Donny W. Suh, MD, FAAP, MBA](#)

[Developing a Cardiac Surgery Telemedicine Project - Suzanne Richardson, MSN-HCSM, RN](#)

[The Use of Telehealth for Surgical Follow-ups and Pre-Op Procedures - Ryan Spaulding, PhD](#)
