

# Enhancing the ACS NSQIP Surgical Risk Calculator to Predict Geriatric Outcomes

6

Geriatric Risk Predictors

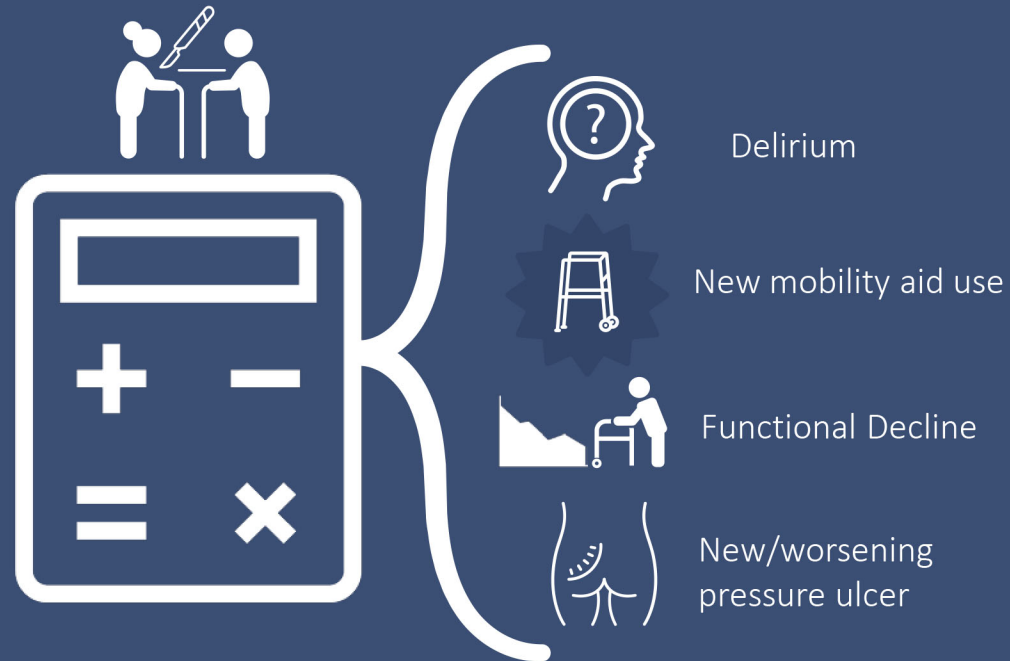

-  Cognitive impairment
-  Mobility aid use
-  Fall history (1 year)
-  Surrogate-signed consent
-  Palliative care on admission
-  Living location

21

Traditional ACS NSQIP Surgical Risk Calculator Predictors

**Inclusion of geriatric risk factors improves prediction for post-op geriatric outcomes**

**Geriatric surgical risk calculator facilitates shared decision-making by providing clinicians with accurate predictions of risk for outcomes important to older adults**
