

Permission Request to Publicly Report NCDB Data, Text, Tables and Figures Terms and Conditions

The American College of Surgeons holds copyrights to all text, tables, figures and data generated by or featured within the NCDB Quality Tools including the NCDB Hospital Comparison Benchmark Reports, Survival Reports, Cancer Program Practice Profile Reports (CP³R), Rapid Quality Reporting System (RQRS), Cancer Quality Improvement Program (CQIP), and the Public Benchmark Reports.

The cancer program may use the reported data for the purpose of identifying and reporting the need for cancer prevention programs, identifying cancer screening needs, justifying grants for the institution, responding to state cancer care plans, patient or program outcomes, as well as education for advocacy, medical education, and patients. **The data generated from the NCDB Quality Tools are not to be used for marketing purposes.** When confidence intervals or statistical significance levels are applicable, they must be included in the report. To publicly report information from any NCDB quality tool, prior authorization must be granted by completing the following form.

Reproduction of text, diagrams, tables and/or figures from the NCDB is limited to:

- Members of CoC-accredited cancer programs wishing to develop print or electronic reports to be distributed to patients and public; including annual reports, public websites, community outreach brochures, announcements of CoC-accreditation.
- Authors of abstracts, articles, or chapters of scientific meetings, medical journals or books that utilize or present NCDB data.

Additional Conditions:

- The tools, content, and data are owned by The American College of Surgeons. You may be granted to use the data as long as you are a participant in the CoC-accreditation program.
- Permission is granted on a limited, non-exclusive basis for both print and electronic one-time use.
- You agree to include a credit line stating the information was derived from the American College of Surgeons' National Cancer Database in all publications and disseminated materials.
- The American College of Surgeons and the Commission on Cancer are not responsible for conclusions drawn from the data.
- The CoC and NCDB's formal [policy](#) **does not** permit public reporting of any survival rates calculated and reported by the NCDB.
- The CoC and NCDB does not permit public reporting of performance rates for **surveillance** quality measures.
- When confidence intervals or statistical significance levels are applicable, they must be included in the report.

For any questions about the reporting policies or the information above, please direct all questions to NCDBCcopyright@facs.org
