

# Scientific Forum e-Poster Guidelines - 2022

## Preparing the Presentation

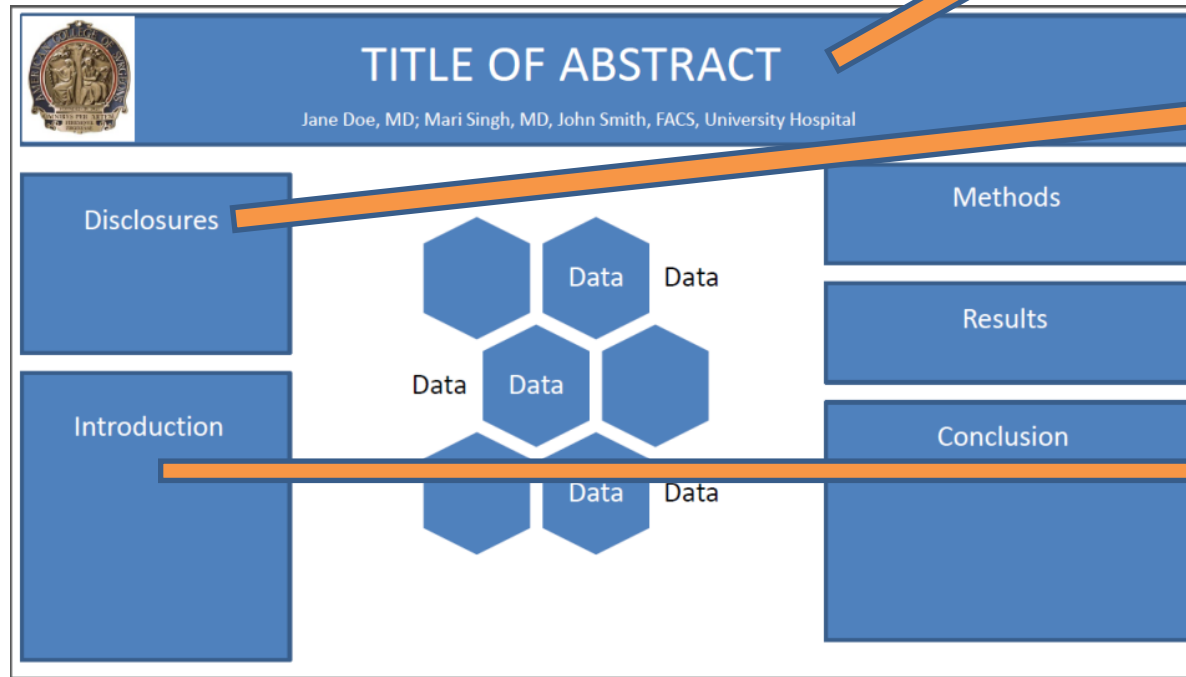

- e-Posters are multi-slide digital files, prepared in a similar format to oral podium presentations. You are **not required** to record a video or audio presentation.
- Aspect Ratio for all e-Posters is 16:9. This is now the default aspect ratio in the newer versions of PowerPoint. If you're using PowerPoint 2010 or older, you will have to change the aspect ratio from 4:3 to 16:9. (Design tab -> Page Setup -> "Slides sized for:" -> Choose "On-screen Show (16:9)")
- **All e-Posters must be saved and uploaded as a PDF.**

## Images

- Acceptable image file formats include JPEG, GIF, TIFF, BMP, PNG.
- Please do NOT use any videos.

Take the components of a traditional, single-image poster [below] and convert each segment into its own slide in PowerPoint 16:9 Aspect Ratio
