

To ACS Cancer QI Dept

Re: Letter of Support for Participation in TApT QI

Date:

Facility Name:

Facility Id Number (FIN):

We are writing to express support for our program's participation in the Timely Administrative post TURBT (transurethral resection of bladder tumor) QI collaborative project which seeks to:

- Improve the quality of cancer care and patient outcomes by accomplishing delivery of intravesical chemotherapy within 24 hours of the procedure
- Assist programs to identify root cause challenges in achieving compliance
- Develop a standardized way for programs to assess and monitor their compliance
- Identify and implement successful and sustainable solutions
- Support participating programs to achieve > a 20% increase of individual baseline

We understand that participation in this collaborative requires a Core QI team that will be responsible for identifying structural and process barriers to achieve testing.

We recognize this work as both important and necessitating of time and resources and agree to support the Core QI team in whatever way they may need as it relates to the project work.

Sincerely,

Cancer Committee Chair:

Urologist (if available):
