Lifelong Quest for Excellence
SESAP 17 Advanced—A Higher Level of Learning

For the first time, the Surgical Education and Self-Assessment Program (SESAP®) is offering advanced content for surgeons interested in more specialized and nuanced information. SESAP is a premier educational resource for practicing surgeons. As a new program with the 17th edition, SESAP 17 Advanced answers the call from practicing surgeons for a deeper exploration of emerging and complex topics.

Program Objectives
SESAP 17 Advanced is intended for surgeons seeking in-depth knowledge in selected areas. Upon completion of SESAP 17 Advanced, participants should be able to:

- Assess their initial knowledge of surgical content in selected topics that may be complex, ambiguous, and evolving
- Exhibit mastery of advanced surgical content to achieve required criteria in each module
- Exemplify lifelong excellence in surgery
- Improve their surgical practice through the application of evidence-based knowledge
- Stay current with emerging and complex surgical advances

Advanced Explorations of Complex Clinical Topics

This inaugural edition of SESAP 17 Advanced continues the SESAP tradition of offering unsurpassed quality educational content. Five modules containing 243 case-based, multiple-choice questions were developed via a rigorous writing and peer review process with 21 practicing surgeons.

Abdomen and Alimentary Tract: Complicated benign and malignant conditions of the abdominal wall, solid abdominal organs, and conditions of the gastrointestinal tract (55 items)

Breast: Cutting-edge topics on genetics, screening, operative techniques, and treatments of benign and malignant breast conditions (44 items)

Endocrine: Challenging topics in malignant and benign disease, rare neuroendocrine tumors, genetics, and complex hormonal problems (37 items)

Surgical Critical Care: Advanced topics on mechanical ventilation, ARDS, sepsis, thromboelastography, and therapeutic hypothermia (57 items)

Trauma: Complex and cutting-edge urgent management topics, including REBOA, vascular shunts, thermal injuries, and traumatic penetrating and blunt injuries (50 items)
Personalized Learning for Your Practice

SESAP 17 Advanced allows surgeons to take further advantage of the newly designed SESAP 17 platform for self-directed learning:

- Explore in-depth critiques on complex topics, including evidence-based explanations for all answer options, educational media, supporting references, and links to PubMed® abstracts
- Receive immediate feedback to facilitate mastery of content
- Highlight text for repeat study
- Save notes, bookmark content, and create folders in your custom library
- Access desired information quickly through targeted search functionality
- Compare your answers and scores with peers and track your performance
- Reset the program for focused learning
- Earn Education Credits of Excellence for higher levels of recognition

Selecting SESAP 17 Advanced Modules

Each of the SESAP 17 Advanced modules is online only and has the corresponding category of SESAP 17 as a prerequisite. SESAP 17 categories can be purchased individually. Subscribers who purchase all 13 categories of SESAP 17 fulfill all prerequisites for SESAP 17 Advanced.

Modules are available as a CME or NonCME version, and all modules purchased must be the same version as the subscriber's SESAP 17 package. In the NonCME version, residents may generate a Resident Report to document progress for program directors.

For details on SESAP 17 categories, package options, and prerequisites, please visit www.ordersesap.facs.org.

The CME version of SESAP 17 Advanced provides up to 61 AMA PRA Category 1 Credits™ beyond SESAP 17, all of which can be used for self-assessment purposes. CME credit is claimed by module; all credit must be claimed by October 31, 2022.

Web access to SESAP 17 Advanced will be discontinued on December 31, 2022, when the program is retired.

**AMA PRA Category 1 Credits™**

The American College of Surgeons designates this enduring activity for a maximum of 61 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

**Royal College of Physicians and Surgeons of Canada Accreditation**

Through an agreement between the American College of Surgeons and the Royal College of Physicians and Surgeons of Canada, MOC Program participants may record completed self-assessment programs or simulation activities developed and accredited by the American College of Surgeons in Section 3 of the Royal College’s MOC Program. Please note that in order to qualify for the Royal College Section 3 MOC, learners must participate in CME-eligible SESAP packages.

**How to Order**

To protect your personal information and to comply with data security guidelines, please purchase **SESAP 17 Advanced** using the secure server at the ACS online store. VISA, MasterCard, and American Express are accepted. Visit [www.ordersesap.facs.org](http://www.ordersesap.facs.org).

Nonmember residents must submit a letter of verification. Please call 312.202.5419 for more information on the process.
