

“The Commission on Cancer brings together experts and advocates from across the country to develop standards for cancer care so that patients with cancer receive the highest quality care coordinated by a team of dedicated physicians and specialists.”

**TIMOTHY WM. MULLETT, MD, MBA, FACS**

*Professor, General Thoracic Surgery*

*Medical Director, Markey Cancer Center Affiliate and Research Networks*

*University of Kentucky, Lexington, KY*

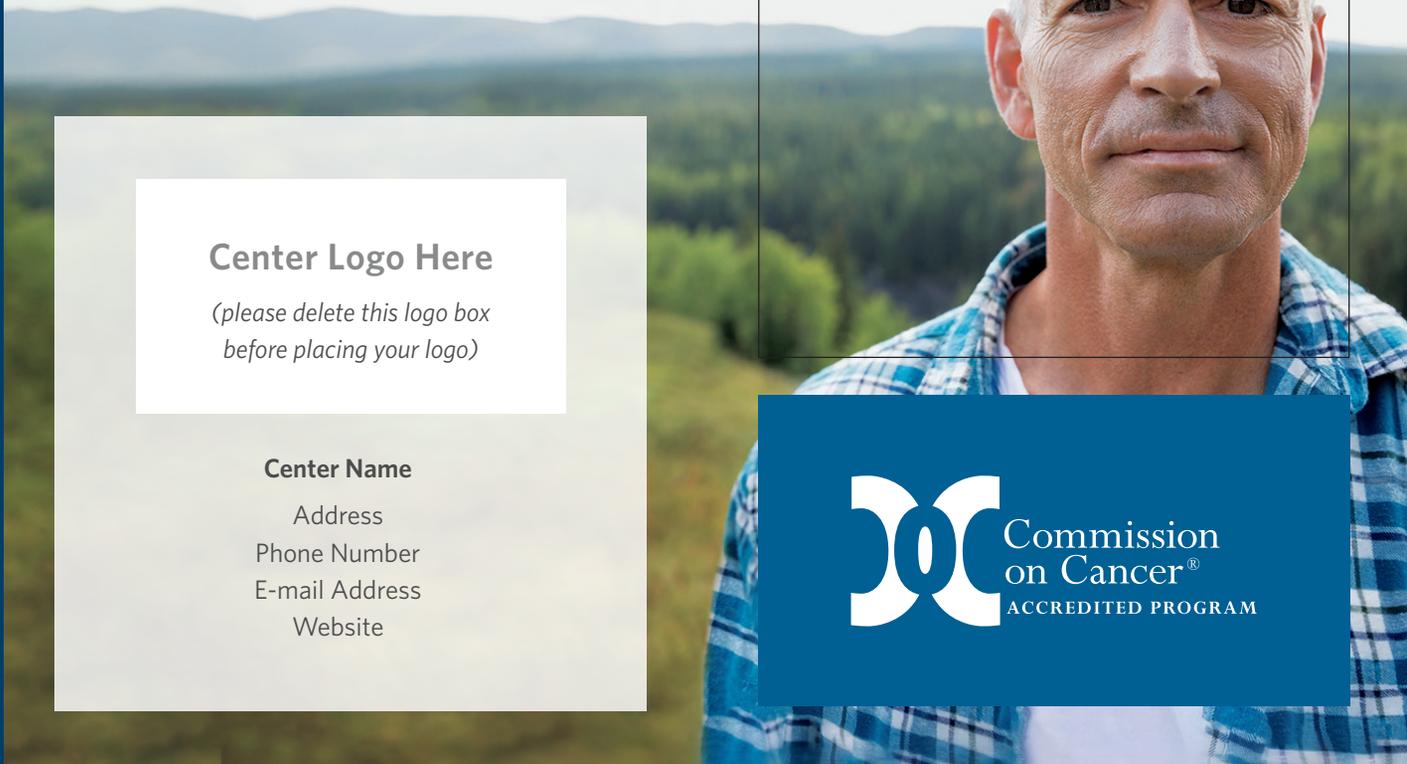

*Chair, Commission on Cancer*

## CoC Mission

The Commission on Cancer (CoC) is a collection of professional organizations dedicated to improving survival and quality of life for people with cancer through standards setting, prevention, research, education, and the monitoring of comprehensive care.

## Quality Cancer Care Focused on You

We know there's a lot on your mind throughout your care journey. That is why there's only one thing on ours—you. With the wellbeing of people with cancer as our number one priority, the American College of Surgeons Commission on Cancer continuously works with hospital cancer programs to improve care and provide you and all people affected by cancer with the best possible outcomes.

The CoC recognizes this cancer program for its patient-first approach and dedication to providing the highest-quality cancer care.

As a CoC-accredited cancer program, this institution is committed to providing you with all the services you need—from diagnosis through treatment, rehabilitation, and survivorship care.

## Access the Most Up-to-Date, Comprehensive Cancer Care

Receiving care from this CoC-accredited cancer program means you will receive:

---

**Comprehensive, personalized care** provided by a team of specialists working closely together

---

**Access to information** on clinical trials and new treatment options

---

**Ongoing monitoring** of care and lifelong follow-up

---

**Mental health support, financial guidance, survivorship care,** and other long-term services

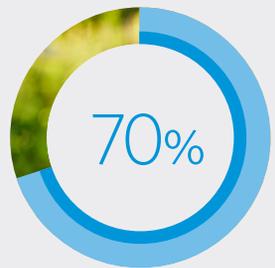

---

**Continuous improvements** in the quality of your care

---

More than 70 percent of people with cancer in the U.S. receive patient-centered care from CoC-accredited cancer programs.
