## Standard 5.8: Pulmonary Resection

### Operation

For any primary pulmonary resection performed with curative intent
(including non-anatomic parenchymal-sparing resections)

**Resect nodes from:**

- **Mediastinum** (Stations 2-9)  
  ≥ 3 distinct stations

- **Hilum** (Stations 10-14)  
  ≥ 1 station

### Pathology Documentation

Synoptic report documents lymph nodes from:

- ≥ 3 mediastinal stations
- ≥ 1 hilar station

with names and/or numbers of stations

### When?

- **2021:** Implementation
- **2024 site visits:** 80% Compliance
