

Cracking the Code to Clinical Trial Enrollment: How to Start and Who Can Help

TUESDAY, OCTOBER 29, 2019 | 7:00 am-4:00 pm

Did you know that there are clinical trials specifically designed for surgery patients?

Are you interested in participating in clinical trials but don't know which certifications are required?

Join us at Clinical Congress 2019 for a special “how-to” session dedicated to physician enrollment in clinical trials. This all-day session gives physicians the flexibility to drop in and work with a dedicated American College of Surgeons Clinical Research Program (ACS CRP) staff member, who will guide you through the administrative requirements needed to increase your participation in clinical trials.

Stop by for information on how to obtain or update the following requirements:

- Registration and Credential Repository (RCR)
- Collaborative Institutional Training Initiative (CITI)
- Good Clinical Practice (GCP)
- Human Subject Protection (HSP)
- HIPAA
- NCI Biosketch
- FDA Form 1572
- CTEP ID

Registration opens in June.
