NTDB BIBLIOGRAPHY

The following bibliography includes citations found through PubMed searches, as well as those supplied by NTDB researchers in response to follow up surveys and e-mails. The list below includes publications, articles in press, and presentations in which NTDB is mentioned. This list is not exhaustive. If you have an NTDB-related publication that is not listed below please provide the citation to ntdb@facs.org.

Healey C, Osler TM, Rogers FB, Healey MA, Glance LG, Kilgo PD, Shackford SR, Meredith JW. Improving the glasgow coma scale score: motor score alone is a better predictor. Trauma. 2003; Apr;54(4):671-8; discussion 678-80.

Meredith JW, Kilgo PD, Osler T. A fresh set of survival risk ratios derived from incidents in the National Trauma Data Bank from which the ICISS may be calculated. J Trauma. 2003; Nov;55(5):924-32.

Millham FH, LaMorte WW. Factors associated with mortality in trauma: Re-evaluation of the TRISS method using the National Trauma Data Bank. J Trauma. 2004; May;56(5):1090-6.

Friese RS, Shafi S, Gentilello L. Pulmonary artery catheter is associated with reduced mortality in severely injured patients: A National Trauma Data Bank analysis of 53,312 Patients. Presented (poster) at the annual meeting of the American Association for the Surgery of Trauma, Maui, HI, September 2004.

Minei JP, Shafi S, Gentilello L. Gender differences in survival may be due to a lower risk of complications in females: An analysis of the National Trauma Data Bank. Presented (poster) at the annual meeting of the American Association for the Surgery of Trauma, Maui, HI, September 2004.

Fantus RJ, Fildes J. NTDB data points: Click click--you're dead? Bull Am Coll Surg. 2005; May;90(5):44.

2005

Wright, JL, Nathens, AB, Rivara, FP, Wessells, H. Renal and extrarenal predictors of nephrectomy from the National Trauma Data Bank (NTDB). *J Urol.* 2006; Feb;175(3 Pt 1):970-5; discussion 975.

Burd RS, Jang TS, Nair SS. Predicting Hospital Mortality Among Injured Children Using a National Trauma Database. *J Trauma.* 2006; Apr;60(4):792-801.
